Personal Information

Nationality: Argentinian - German
Date of Birth: 23.08.1983
Two children, born 2017 and 2021

Research Profile

I am an experimental psychologist investigating motor awareness and its underlying cognitive and biological mechanisms. I focus on different aspects of motor awareness and the subjective experiences associated with it: the awareness of intentions (volition), the awareness of control (agency), and motor experience (motor metacognition). I use behavioural experiments, sometimes complemented by EEG and (f)MRI.
